Work Experience

Summer 2009 — Summer Intern at MRC Team Trade
The position consisted of performing various tasks around the workshop. Discipline, responsibility, attention to detail, and endurance are some of the skills developed working as an intern at GMC Team Trade.

Summer 2010-2012 — Summer Intern at TINE Meierier Sør
Stock. What I learned working at this position was how to work well in a hectic environment while still meeting daily goals.

Summer 2013 — Summer Intern at Stavanger Airport, Sola - Avinor: Duty Free
Storage position. Built further on the skills I developed working at Tine.

Summer 2014-2015 — Summer Intern at Nature Oil and Gas
I was involved in 2D and 3D design of technical drawings, using Inventor Professional 2014, and the implementation of the version control system Vault Professional. The position also included updating technical schematics of components. The importance of paying close attention to detail and being a part of a larger team are skills I developed at this position.

Education

June 2015 — Bachelor of Engineering Construction, **NTNU**, (prev. HIST), Trondheim

August 2015 - Januar 2018 — Master of Technology Industrial Cybernetics, **NTNU**, Trondheim
